

## Comet 12 Quick Reference

The functionality of the Comet12 is the same as the Comet15. The following outlines keyboard commands to access the Tadpole Comet menu system and other features controlled by the Function keys.

---

- The **Stop** key is the Menu key above the End key. It is the second key from the bottom on the right side of the keyboard. It has a symbol similar to the following: 
  - **Stop-V**: This displays the hardware version, the firmware version, and the MAC address of the Comet 15.
  - **Stop-W**: This opens the Wireless Setup OSD.
  - **Stop-M**: This opens the OSD Main Menu for Comet settings.
  - **Stop-N**: This will briefly display the unit's MAC Address, IP Address, Connection Status, and Server IP Address.
  - **Stop-A**: This resets the Comet.
- 

## Function Key Combinations

- **Fn-F1**: Opens Gnome Terminal Help if the Server is a JDS Release 2 unit.
  - **Fn-F2**: Toggles the wireless radio ON/OFF.
  - **Fn-F6**: Turns Mute ON/OFF.
  - **Fn-PgUp**: Raises the volume.
  - **Fn-PgDn**: Lowers the volume.
  - **Fn-F8**: Increases the brightness of the display.
  - **Fn-F9**: Decreases the brightness of the display.
-
