

WHY WE'RE COMPLETELY TWO-FACED ABOUT UNIX.

One of the best things about UNIX has always been its ability to run on different kinds of hardware. We think a UNIX word processor should have the ability to do the same.

Presenting WordPerfect® 5.1 for UNIX. Inside every box of WordPerfect 5.1 you'll find both a version for GUI (Graphical User Interface) terminals and a version for character terminals. Whichever you choose, you'll get the level of performance that earned *UnixWorld's* Best Product of 1992 award.

With WordPerfect 5.1, you get a GUI and character-based version in every box.

With WordPerfect's GUI version, you'll enjoy a screen that's clear and easily customized. Extensive windowing abilities for copying or pasting between as many as nine documents at once. Not to mention a Ruler for point-and-click formatting, a Button Bar™ for creating shortcuts to any feature or function, and a very convenient Zoom Edit command.

Button Bar. Turn your most-used functions into single-click shortcuts.

But what if you don't go for the GUI? Just choose the Character version, and depending on your hardware, you'll get

great-looking features rarely seen on a character terminal. Like document preview, column layout, and other important features such as easy-to-use drop down menus and easy-to-understand help screens.

All of which leads to how easy WordPerfect 5.1 is to support. Its cross-platform compatibility makes transferring documents between other versions of WordPerfect (like DOS or Windows) virtually foolproof. What's more, its functions are familiar to more users than any other word processor in the world.

So find out today about the program *UnixWorld* declared "a breakthrough" that "deserves applause." Call (800) 526-5031 for your free descriptive brochure.

Comprehensive Ruler. Access dozens of formatting features at the click of a button.
